

# ACCELERATION OF GENETIC ALGORITHMS USING ARTIFICIAL NEURAL NETWORKS - APPLICATION OF THE METHOD

**K.C. GIANNAKOGLOU** , Assistant Professor  
**A.P. GIOTIS** , Postgraduate Student

NATIONAL TECHNICAL UNIVERSITY OF ATHENS,  
Lab. Of Thermal Turbomachines ,  
P.O. Box 64069, Athens 157 10, GREECE  
Email : kgianna@central.ntua.gr

## Contents

<b>1</b>	<b>Numerical Test Cases</b>	<b>3</b>
1.1	Single-Objective Numerical Optimization . . . . .	3
1.2	Two-Objective Numerical Optimization . . . . .	6
<b>2</b>	<b>Optimization and Design Problems in Aerodynamics</b>	<b>8</b>
2.1	Profile Parameterization . . . . .	8
2.2	Parametric Studies Using the Panel Method . . . . .	9
2.3	Re-design of the <i>NACA 0012</i> Airfoil - Inviscid flow . . . . .	12
2.4	Re-design of the <i>NACA 0012</i> Airfoil - Laminar flow . . . . .	14
2.5	Re-design of a Transonic Airfoil - Inviscid flow . . . . .	14
2.6	Multi-Objective, Viscous Flow Optimization . . . . .	15
<b>3</b>	<b>Inverse Design Problems in Turbomachinery</b>	<b>17</b>
3.1	Inverse Design of a High-Turning Turbine Nozzle . . . . .	17
3.2	Inverse Design of a Controlled-Diffusion Compressor Cascade . . . . .	23
<b>4</b>	<b>Conclusions</b>	<b>24</b>
