1	Introduction	3
1.1	Motivation	3
1.2	Background	4
1.3	Objectives and plan	7
2	Boundary Immersion	9
2.1	Surface tessellation	11
2.2	Polygon triangulation	13
2.3	Ray tracing	13
2.4	Segment triangle intersection	16
2.5	Boundingbox check	18
3	Immersed Boundary Forcing	19
3.1	Governing equations	19
3.2	Numerical method	19
3.3	Feedback forcing	21
3.4	Direct forcing	23
3.5	Penalty Methods	23
3.6	Efficiency of the immersed boundary forcing	24
3.7	IB/LES modeling	24
4	Boundary Reconstruction	27
4.1	Linear interpolation method	29
4.2	Revised linear interpolation method	30
4.3	Quadratic interpolation method	31
4.4	Quadratic+momentum interpolation method	32
4.5	Near-wall modeling	33
4.6	Moving boundaries	35
5	Applications	37
5.1	Flow around a circular cylinder	37
5.2	Flow in a model IC piston-cylinder assembly	38
5.3	Flow around a model road vehicle	39
5.4	Flow around a hydrofoil	40
5.5	Flow in a mechanical heart valve	42
6	Conclusions	45
6.1	Challenges	45
6.2	Closing remarks	47
