

# Shock/vortex and shock/turbulence interactions

Sergio Pirozzoli

Dipartimento di Meccanica e Aeronautica

University of Rome ‘La Sapienza’

Via Eudossiana 18, 00184 Roma (Italy)

## Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>Theoretical background</b>	<b>4</b>
<b>3</b>	<b>Shock/vortex interactions</b>	<b>9</b>
3.1	Shock/cylindrical vortex interactions . . . . .	10
3.1.1	General features . . . . .	10
3.1.2	Acoustic analogy for sound production . . . . .	12
3.2	Shock/ring vortex interactions . . . . .	16
3.2.1	Effect of vortex angle . . . . .	18
3.2.2	Effect of shock strength . . . . .	18
3.2.3	A simplified model . . . . .	19
<b>4</b>	<b>Shock/turbulence interactions</b>	<b>20</b>
4.1	Shock/isotropic turbulence interaction . . . . .	20
4.2	Shock/turbulent boundary layer interaction . . . . .	23
4.2.1	Instantaneous flow properties . . . . .	23
4.2.2	Mean flow properties . . . . .	24
4.2.3	Unsteady features . . . . .	25
<b>5</b>	<b>Perspectives</b>	<b>26</b>
