Contents

| | | |
|----------|---|-----------|
| 1 | Introduction | 2 |
| 2 | Level-Set Framework for Interfacial Two-Phase Flow | 5 |
| 2.1 | Fluid Motion | 5 |
| 2.2 | Level-Set Interface Description | 5 |
| 2.3 | Single Field Level-Set Formulation for Interfacial Two-Phase Flow | 6 |
| 3 | Pressure correction method | 7 |
| 4 | Treatment of Discontinuities | 9 |
| 4.1 | Weak Formulation | 9 |
| 4.2 | Jump Condition Formulation | 10 |
| 4.3 | Test Case: Buoyant Droplet in Creeping Flow | 13 |
| 4.4 | Test Case: Stationary Droplet/Laplace Problem | 15 |
| 5 | Interface Evolution | 18 |
| 5.1 | Level-Set Advection | 18 |
| 5.2 | Level-Set Reinitialization | 20 |
| 5.3 | Combined Level-Set/Volume-of-Fluid Advection Methods | 21 |
| 5.4 | Test Case: Fluid Disk in a Single Reversed Vortex | 23 |
| 5.5 | Conclusion | 24 |
| A | CLSVOF method | 27 |
| B | MCLS method | 28 |
| C | Volume Fraction Function | 32 |
| C.1 | Forward Function | 32 |
| C.2 | Inverse Problem | 35 |
