## Contents

<b>1</b>	<b>Introduction</b>	<b>2</b>
<b>2</b>	<b>Scalar transport Modelling</b>	<b>3</b>
<b>3</b>	<b>Surface Renewals (SR) Models</b>	<b>4</b>
3.1	The original idea . . . . .	4
3.2	The Large-Eddy and Small-Eddy model variants . . . . .	5
<b>4</b>	<b>Surface Divergence (SD) Models</b>	<b>5</b>
4.1	The basic idea . . . . .	5
4.2	Blocking-theory based SD model . . . . .	7
<b>5</b>	<b>DNS of air-water sheared surface flow</b>	<b>8</b>
5.1	The problem setup . . . . .	8
5.2	Turbulence statistics . . . . .	9
<b>6</b>	<b>Scalar exchange parameterizations</b>	<b>10</b>
6.1	Surface turbulence interactions . . . . .	10
6.2	Surface Renewal Model Comparisons . . . . .	12
6.3	Surface Divergence Model Comparisons . . . . .	16
<b>7</b>	<b>Conclusions</b>	<b>19</b>
