

Fundamentals of aero-acoustical analogies

Jérôme Anthoine
von Karman Institute for Fluid Dynamics

November 2007

Contents

1	Introduction	3
2	Direct and hybrid methods for CAA	5
3	Lighthill's acoustic analogy	7
3.1	Lighthill's equation	7
3.2	Free-space Green's function	9
3.3	Green's function applied to Lighthill	10
3.4	Far-field approximation	11
3.5	Application to jet noise	11
3.6	Alternative form	14
4	Extensions of the analogy	15
4.1	Ffowcs-Williams and Hawkings equation	15
4.2	Curle's theory	18
4.3	Generalization to moving sources	19
4.4	Kirchhoff method	20
5	Howe's acoustic analogy	23
5.1	Vortex Sound Theory	23
5.2	Application of the VST	24
6	Sound power scalings and directivity with source type	29
