

Measurement Techniques for Turbulent Combustion Instabilities

Simone Hochgreb* and Ramanarayanan Balachandran†

* University of Cambridge

† University College London

3 Dec 2007

Contents

1	Introduction	3
2	Laser-Induced fluorescence	5
2.1	Fundamentals	5
2.2	LIF Signal	7
2.3	Planar LIF	8
2.4	Image/signal intensification:	9
2.5	Fuel species measurements: tracer LIF	10
2.6	Fuel/air ratio detection (FARLIF)	11
2.7	Heat release via LIF	12
2.7.1	Reaction-rate Imaging	12
2.7.2	Flame surface detection	13
3	Rayleigh and Raman Scattering	15
3.1	Fundamentals	15
3.2	Rayleigh Scattering	15
3.3	Raman Scattering	17
4	Fixed and tunable absorption	21
4.1	Fundamentals	21
4.2	Tunable Diode Laser Sensing	21
5	Summary	25
