

## TABLE OF CONTENTS

	Page
<b>I. INTRODUCTION</b> . . . . .	1
<b>II. GOVERNING EQUATIONS</b> . . . . .	3
2.1 Cartesian Formulation . . . . .	7
2.2 Streamwise Pressure Gradient Treatment . . . . .	10
2.3 Coordinate Transformation . . . . .	12
2.4 Integral Form of the Equations . . . . .	13
<b>III. METHODS OF SOLUTION</b> . . . . .	13
3.1 Vigneron et al. (1978) . . . . .	15
3.2 Schiff and Steger (1979) . . . . .	16
3.3 Numerical Dissipation Terms . . . . .	17
3.4 Lawrence et al. (1978) . . . . .	20
3.4.1 Streamwise Numerical Flux Definition . . . . .	22
3.4.2 Crossflow Numerical Flux Definition, Inviscid . . . . .	26
3.4.3 Crossflow Numerical Flux Definition, Viscous . . . . .	26
3.4.4 Implicit Algorithm . . . . .	28
3.5 Locally Iterated Methods . . . . .	30
3.6 Initial Conditions . . . . .	31
3.7 Boundary Conditions . . . . .	31
3.7.1 Solid Surface Conditions . . . . .	31
3.7.2 Shock Boundary Conditions . . . . .	33
<b>IV. REAL GAS MODELS</b> . . . . .	34
4.1 Equilibrium Air . . . . .	37
4.2 Nonequilibrium Air . . . . .	38
4.2.1 Fully-Coupled Methodology . . . . .	45
4.2.2 Loosely-Coupled Methodology . . . . .	48
<b>V. TURBULENCE MODELING</b> . . . . .	48
5.1 Algebraic Models . . . . .	50
5.2 Two-Equation Models . . . . .	52
<b>VI. COMPUTATIONAL EXAMPLES</b> . . . . .	52
6.1 Two-Dimensional Perfect Gas Cases . . . . .	52
6.1.1 Flat Plate Boundary Layer . . . . .	53
6.1.2 Hypersonic Compression Corner . . . . .	55
6.1.3 Hypersonic Symmetric Inlet . . . . .	56
6.1.4 Hypersonic Asymmetric Inlet . . . . .	57
6.1.5 Sonic Boom for a Cone-Cylinder . . . . .	57

	Page
6.2 Three-Dimensional Perfect Gas Cases . . . . .	57
6.2.1 Circular Cone at Angle-of-Attack . . . . .	57
6.2.2 Shock-Shock Interactions . . . . .	59
6.3 Axisymmetric Real Gas Cases . . . . .	63
6.3.1 Cone at Zero Incidence: Equilibrium Air . . . . .	64
6.3.2 Cone at Zero Incidence: Nonequilibrium Air . . . . .	65
6.4 Three-Dimensional Real Gas Cases . . . . .	65
6.4.1 Cone at Angle-of-Attack: Nonequilibrium Air . . . . .	65
6.4.2 Generic Hypersonic Vehicle . . . . .	65
<b>VII. CONCLUDING REMARKS . . . . .</b>	<b>67</b>
<b>ACKNOWLEDGEMENTS . . . . .</b>	<b>69</b>
<b>REFERENCES . . . . .</b>	<b>70</b>
