

Lecture Series
Post-Processing of numerical and experimental data
February 11-15, 2008
von Kármán Institute for Fluid Dynamics
Rhode-Saint Genèse, Belgium

POST-PROCESSING OF TIME-RESOLVED PIV DATA
UNSTEADY AERODYNAMIC FORCES AND PLANAR PRESSURE IMAGING

Fulvio Scarano and Bas W. van Oudheusden

Delft University of Technology
Department of Aerospace Engineering
F.Scarano@TUDelft.NL

1	INTRODUCTION	2
2	AERODYNAMIC LOADS FROM PIV	2
2.1	Theoretical background	3
2.1.1	Planar pressure evaluation	4
2.2	Numerical gradient-integration strategy	5
3	UNSTEADY AERODYNAMIC FORCES ON SQUARE PRISM	8
3.1	Aerodynamic force coefficients	9
4	STEADY AIRFOIL AERODYNAMIC COEFFICIENTS	11
4.1	Principle implementation	11
4.2	Experimental layout	12
4.3	Aerodynamic forces	16
4.4	Extension to compressible flows	19
5	CONCLUSIONS	20
	REFERENCES	20
