

DYNAMIC STABILITY OF SPACE CAPSULES AT LOWER SPEEDS

Özgür Karatekin *
Royal Observatory of Belgium

Contents

1	Introduction	3
2	Flow field	3
2.1	3D Average flow field	4
2.2	Instantaneous flow field	5
2.3	Frequency content of the wake	7
2.4	Wake and surface pressure variations	8
3	Non-dimensional oscillation frequency of entry vehicles	9
4	Forced Oscillations	11
4.1	Variation of surface pressure and angular position	11
4.2	Comparison with stationary model	13
4.3	Cross correlation and phase delay	15
4.4	Hysteresis in surface pressures	15
5	Discussion and Conclusions	17

*I am grateful to Dr. J-M. Charbonnier and Dr. F. Wang for their valuable contributions. This study was carried out at the von Karman Institute for Fluid Dynamics, Belgium. Laboratory personnel of Aeronautics/Aerospace Department are gratefully acknowledged.
