

CONTENTS

Chapitre 1 Turbo-engine principles.....	3
1. Whole turbo-engine dynamics objectives	5
2. The 2D modelling	6
3. The 3D modelling	7
Chapitre 2 Rotor-dynamics modelling.....	8
1. Rotordynamic phenomenology	11
1.1. The rigid disk	12
1.2. The beam model.....	13
Chapitre 3 Phenomenological model	15
1. Campbell diagram and critical speeds	18
2. Dissymmetry influence on rotordynamics	19
3. Damping.....	21
4. Instabilities	23
Chapitre 4 Rotordynamics modelling components	26
1. Rotors and bladed disks	26
1.1. Rotors	26
1.2. Bladed disks.....	26
2. Stators	27
a- Casings:.....	27
b- Strainghteners:.....	27
c- Equipment:	27
d- Structural casing:.....	28
e- Flexible links:	28
3. Squeeze film	28
4. Bearings	30
Chapitre 5 Loadings	34
1. Imbalance forces.....	34
2. Accidental imbalance.....	35
3. Manoeuvre loadings.....	36
Chapitre 6 Dimensioning elements	38
1. Campbell diagram.....	38
3. Dual-rotor specificities.....	39
4. Imbalance responses and dimensioning	40
