

Closed-loop flow control

Part I) Robust and phase control

Rudibert King*
Chair of Measurement and Control
Berlin University of Technology
Germany

February 6, 2009

Contents

1	Introduction	3
2	Basic concepts	5
2.1	Notation	5
2.2	Modelling and identification of linear systems	5
2.3	Control of linear systems	9
2.4	Model-based estimation	10
3	Robust control of a 2D bluff body	13
4	Phase control of a 2D bluff body	17

*This work was supported by the German Research Foundation (DFG) through the Collaborative Research Center SFB 557 'Control of complex turbulent shear flows. Special thanks go to the former PhD students Lars Henning and Mark Pastoor who contributed the experimental part of this work.
