

Numerical Methods: DNS

Richard Sandberg
University of Southampton

March 2009

Contents

1	Introduction	3
2	Historical Overview	3
2.1	Incompressible DNS	3
2.2	Compressible DNS	6
2.3	DNS for Aeroacoustics	7
3	Governing Equations	8
4	Why is the Reynolds Number an Issue?	8
5	Numerical Issues	10
5.1	Finite Difference Schemes	11
5.1.1	Wavenumber Resolution	12
5.1.2	Time Advancement Schemes	14
5.1.3	Stability of the Numerical Method	16
5.2	Boundary Conditions	18
5.3	Validation	19
5.4	High Performance Computing	20
6	The ‘Virtual Wind Tunnel’	21
6.1	Strained Channel Flow	21
6.2	Supersonic Axisymmetric Wakes	23
6.3	Trailing Edge Noise	25
