

**AEROACOUSTICS OF WALL-BOUNDED FLOWS  
NOISE FROM LIFTING SURFACES – ANALYTICAL MODELLING**

**Michel Roger, Ecole Centrale de Lyon**

**CONTENT**

**I INTRODUCTION**

**II ANALYTICAL UNSTEADY AERODYNAMICS**

- II-1 Introduction**
- II-2 Basic Assumptions – Linearised Theory**
- II-3 Some Formulae**
- II-4 Unsteady Aerodynamics for Trailing-Edge Scattering**
- II-5 The Reversed Sears' Problem**

**III APPLICATION TO LIFTING-SURFACE BROADBAND NOISE**

- III-1 Turbulence-Interaction Noise**
- III-2 Trailing-Edge Noise**
- III-3 Vortex-Shedding Noise**
- III-4 Scaling laws and comparisons with measurements**

**IV OTHER APPLICATIONS**

- IV-1 High-Lift Device Noise**
- IV-2 Comments on the Backward-Facing Step**
- IV-3 The Bullroarer**
