March 2009

Contents

1	Introduction	3
2	Quick review of analytical models	3
3	Experimental data base	4
3.1	Experimental setup	4
3.2	Instrumentation and Measurements	7
3.3	Installation Effects	8
4	Trailing edge noise	12
4.1	Experimental validation	12
4.1.1	Single-Frequency Directivity	12
4.1.2	Spectral Validation	15
4.2	Numerical predictions	18
4.2.1	Fan background	18
4.2.2	Methodology and numerical methods	19
4.2.3	NACA 6512-63 airfoil at 0 °	21
4.2.4	CD airfoil at 8°	25
4.2.5	CD airfoil at 15 °	33
4.2.6	NACA-0012 at near stall and stall	36
4.2.7	Extension to a rotating blade	41
5	Turbulence-interaction noise	45
5.1	Experimental validation	45
5.2	Numerical predictions	49
