6 May 2009

Contents

1	Introduction on CFD	3
2	Research interest	3
2.1	Industrial needs	3
2.2	WALLTURB project	4
2.3	Wall bounded turbulent flows	4
3	Numerical Codes	5
3.1	Introduction	5
3.2	Algorithm	5
3.3	Optimization, Parallelization	10
3.3.1	MPI Parallelization	10
3.3.2	Optimization on Vectorial architectures	10
3.3.3	Global parallel performances	12
3.4	Data format	13
3.5	Futur improvements	14
4	Post-Processing	18
4.1	Post-processing strategy	18
4.2	Post-processing of MFLOPS3D results	18
5	Direct Numerical Simulations	21
5.1	Description	21
5.2	Results	21
5.2.1	Spatial resolution	21
5.2.2	Statistics of turbulence	24

*in collaboration with M. Marquillie

6	Large Eddy Simulations	27
6.1	Introduction	27
6.2	Numerical implementation	27
6.3	Wall Adaptive Local Eddy-viscosity Model (WALE)	28
6.4	Dynamic Smagorinsky Model (DSM)	28
6.5	Results	29
7	Conclusion and futur work	34
8	Acknowledgment	34
