

# Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>Overview of Multigrid Techniques</b>	<b>5</b>
2.1	Multigrid algorithms for linear systems . . . . .	5
2.2	Multigrid algorithms for nonlinear systems . . . . .	6
2.2.1	Newton multigrid method . . . . .	7
2.2.2	Full approximation scheme . . . . .	8
2.3	Full multigrid method . . . . .	9
2.4	Multigrid error transformation operator for linear problems . . . . .	10
<b>3</b>	<b>Fourier Analysis of Discrete Operators</b>	<b>12</b>
3.1	Introduction . . . . .	12
3.2	Fourier symbols of grid operators . . . . .	14
3.2.1	Fine grid and smoothing operator . . . . .	15
3.2.2	Restriction operator . . . . .	16
3.2.3	Coarse grid operator . . . . .	17
3.2.4	Prolongation operator . . . . .	17
3.3	Two-grid Fourier analysis . . . . .	19
3.4	Three-grid Fourier analysis . . . . .	22
3.5	Definition of convergence rates . . . . .	29
3.6	Optimization of multigrid performance . . . . .	30
<b>4</b>	<b>Analysis and Optimization of Runge-Kutta Smoothers for the Advection-Diffusion Equation</b>	<b>32</b>
4.1	Summary of space-time discontinuous Galerkin discretization . . . . .	32
4.2	Pseudo-time Runge-Kutta smoothers . . . . .	33
4.3	Fourier analysis of multilevel algorithms for the 1D advection-diffusion equation . . . . .	35
4.3.1	Fourier analysis of the two-level algorithm . . . . .	36
4.3.2	Fourier analysis of the three-level algorithm . . . . .	37
4.4	Optimization of Runge-Kutta smoothers for the 2D advection-diffusion equation . . . . .	38
4.4.1	Optimized Runge-Kutta smoothers for space-time DGFEM . . . . .	38
4.4.2	Testing multigrid performance . . . . .	41
<b>5</b>	<b>Conclusions</b>	<b>46</b>
<b>A</b>	<b>Space-Time DG Discretization of the Advection-Diffusion Equation</b>	<b>49</b>
A.1	Space-time elements . . . . .	49
A.2	Function spaces and trace operators . . . . .	50
A.3	Weak formulation . . . . .	51
A.4	Inter-grid transfer operators . . . . .	54
A.5	DG multigrid matrices for the advection-diffusion equation in 1D . . . . .	54
A.5.1	Matrices for a second order accurate discretization . . . . .	55

A.5.2 Matrices for a third order accurate discretization . . . . .	56
<b>B Auxiliary Results</b>	<b>59</b>
