1	Introduction	2
2	Introduction to helicopter dynamics	4
2.1	General	4
2.2	Relevant scales	5
3	Numerical method	7
3.1	Euler equations in a moving and deforming space-time domain	7
3.2	Geometry of space-time elements	8
3.3	Flow field expansion	8
3.4	Weak formulation of the Euler equations	9
4	Multi-time multi-grid techniques	10
4.1	Convergence to periodic solutions	10
4.2	Application to rotor flow	13
4.3	Grid generation	13
4.3.1	Simple approach	15
4.3.2	Motion representation under time refinement	15
4.3.3	Partial time levels	15
4.4	MTMG algorithm - smoother, grid levels, prolongation operator	17
4.4.1	Smoother	17
4.4.2	Restriction and prolongation operators, definition of grid levels	18
4.5	Grid design and expected speedups	22
5	Adaptation strategies	25
5.1	Introduction	25
5.2	Adaptation on streak lines	25
6	Results	29
6.1	Transonic oscillating NACA0012	29
6.2	7AD rotor in forward flight	33
7	Conclusions	42
