

Effect of bubble formation on electrode processes, and simulation

H. Van Parys P. Maciel S. Van Damme

Research Group Electrochemical and Surface Engineering
Vrije Universiteit Brussel, 1050 Brussels, Belgium

3th of December 2009

Contents

1	Introduction	3
2	Electrochemical system	3
3	Electrochemical reactor [1]	3
4	Electrochemistry model	4
5	Gas-evolving electrochemistry modeling	9
5.1	Fluid flow	10
5.1.1	Gas fraction	11
5.1.2	Bubbles movement	11
5.2	Gas phase	11
5.2.1	Drag force	12
5.2.2	Added mass force	12
5.2.3	Saffman lift force	12
5.3	MITReM model	12
5.4	Supersaturation model [2]	13
5.5	Nucleation model [3]	15
5.6	Simulation	20
6	Conclusions	22
