

Role of heat transfer in electrochemical systems

Nico Smets
Vrije Universiteit Brussel

4 december 2009

Contents

1	Introduction	3
2	Quantitative heat transfer in electrochemical systems	3
2.1	Conduction	3
2.2	Convection	4
2.3	Radiation	4
2.4	Energy equation	4
3	Electrochemical Machining (ECM)	4
4	Problem description	5
4.1	Plain averaging as inadequate solution	5
5	Hybrid theory	7
5.1	Conduction in the electrode	9
5.1.1	Lumped Capacity Solution	10
5.1.2	Transient Conduction in a 1D slab	12
5.2	Convection in the electrolyte	16
5.3	Species concentration evolution	16
6	Numerical application	17
6.1	Hybrid time stepping	18
7	Conclusions	21
