

Heat problems in anodizing processes

T. Aerts*, I. De Graeve, H. Terryn

Research Group Electrochemical and Surface Engineering,
Vrije Universiteit Brussel, Pleinlaan 2, B-1050 Brussels, Belgium.

4/12/2009

Contents

1	Introduction	3
2	Influence of temperature and heat transfer on the process	5
2.1	experimental conditions	5
2.2	Differences in local temperature due to convection	6
2.2.1	Results	6
2.3	Discussion	10
3	Influence of the electrode temperature on the process	12
3.1	Experimental setup and conditions	13
3.2	Influence on the electrochemical behaviour	13
3.3	Influence of temperature on the oxide layer	15
3.4	Discussion	16
4	Conclusions	18
	References	21
