

# Operability: Ignition and altitude relight

E. Mastorakos \*

Engineering Department, University of Cambridge

February 2010

## Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>Fundamental aspects</b>	<b>3</b>
2.1	The various phases of ignition . . . . .	3
2.2	Phase 1: kernel generation . . . . .	3
2.3	Phase 2: flame growth . . . . .	6
2.4	Phase 3: burner ignition . . . . .	9
<b>3</b>	<b>Realistic geometry results</b>	<b>10</b>
3.1	The problem of ignition at high altitude . . . . .	10
3.2	Gas turbine combustor ignition . . . . .	11
3.3	Phase 4: engine ignition . . . . .	12
<b>4</b>	<b>Calculation methods</b>	<b>13</b>
<b>5</b>	<b>Closing remarks</b>	<b>13</b>

---

\*The original work at the University of Cambridge reviewed here has been funded by the EPSRC, EU, and the Rolls-Royce Group. Thanks to Drs. John Moran, Ruud Eggels, Ken Young, Peter Schober of Rolls-Royce for useful discussions.
