

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Motivation . . . . .	1
1.2	Outline . . . . .	3
<b>2</b>	<b>Methodologies</b>	<b>5</b>
2.1	Introductory remarks . . . . .	5
2.2	Problem Formulation . . . . .	5
2.3	Solution strategy: to conform or not? . . . . .	6
2.4	An embedded-boundary method with adaptive mesh refinement . . . . .	7
2.4.1	Background . . . . .	7
2.4.2	Grid topology . . . . .	8
2.4.3	Prolongation and restriction operators . . . . .	9
2.4.4	Temporal integration scheme . . . . .	11
2.4.5	A direct forcing scheme based on moving least squares . . . . .	11
2.4.6	Fluid-structure interaction and summary of the algorithm . . . . .	13
2.4.7	Examples . . . . .	14
<b>3</b>	<b>Applications</b>	<b>19</b>
3.1	Internal flows . . . . .	19
3.2	External Flows . . . . .	23
