Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 3 |
| 2 | LES equations for atmospheric turbulence | 4 |
| 3 | Subgrid-scale modeling | 5 |
| 3.1 | The Smagorinsky model | 5 |
| 3.2 | The dynamic model | 7 |
| 3.3 | The scale-dependent dynamic model | 10 |
| 3.4 | A modulated gradient model | 13 |
| 4 | Surface boundary conditions | 14 |
| 4.1 | Similarity-based boundary conditions | 14 |
| 4.2 | The MKP model | 16 |
| 4.3 | Surface heterogeneity effects | 16 |
| 5 | Wind energy applications | 19 |
| 5.1 | Wind-turbine parameterizations | 19 |
| 5.2 | Turbine model testing | 21 |
| 5.3 | A wind farm in a stable boundary layer | 26 |
