

Effect of rotation on the wake of a lift generating body

Douglas Neal, Ph.D. *
Turbulent Shear Flows Laboratory
A-38 Engineering Research Complex
Michigan State University
East Lansing, MI 48824
dneal@msu.edu

23 September 2010

Contents

1	Introduction	3
2	The Rotating CD Blade	4
2.1	Profile shape and Reynolds number matching	6
2.2	Angle of attack and angle of incidence	7
2.3	Aerodynamic loading	7
2.4	Final design and validation	11
3	CD airfoil: stationary and rotating	15
3.1	Measurement techniques	15
3.2	Experimental facilities	15
3.3	Mean wake parameters	17
3.4	Turbulence parameters	21
