

# Flame dynamics modeling based on G-equation

T. Schuller, D. Durox and S. Candel \*

Laboratoire EM2C, CNRS and Ecole Centrale Paris, France

November 15-19 2010

## Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>Flame sheet dynamics</b>	<b>3</b>
2.1	Perturbations in flame front position . . . . .	5
2.2	Perturbations in flame surface area . . . . .	8
2.3	Fluctuations in heat release rate . . . . .	10
<b>3</b>	<b>Mixture composition oscillations</b>	<b>13</b>
<b>4</b>	<b>Turbulent flames</b>	<b>16</b>
<b>5</b>	<b>Conclusion</b>	<b>18</b>

---

\*S. Candel is also with Institut Universitaire de France
