Contents

1. List of symbols	1
2. Introduction	2
3. Basic relations of stagnation point heat flux	3
4. Experimental tools	8
4.1 Arc Heated Facility L2K	8
4.2 Power supply for electromagnetic coils	9
4.3 Test model	10
4.4 Measurement techniques	11
5. Determination of the flow parameters	12
5.1 Velocity measurements using microwave interferometry	17
5.2 Pitot pressure measurement and deduction of other flow parameters	18
6. Heat flux measurements	20
7. Concluding remarks	23
8. References	23
