	page
1. Introduction	6
2. Ideal flow pattern within centrifugal impellers ..	8
3. Real flow character as known from conventional slow-response measurements	13
3.1 Measurement technique	13
3.2 Results of conventional slow-response measurements	16
4. Fast-response dynamic pressure measurements	25
5. Laser Two Focus Velocimetry (L2F)	30
5.1 Measurement technique	30
5.2 Laser measurements within a radially ending impeller	33
5.3 Laser measurements within a backswept impeller	46
5.4 Laser measurements within a splitter blade impeller and within the vaned diffuser inlet area	47
6. Summary	68
7. References	69
