

Lecture Notes
on
Answering Thermodynamic Questions
with
3-D Viscous Flow Calculations
by
John Moore
Dept. of Mechanical Engineering
Virginia Polytechnic Institute and State University

	page
A Introduction	3
B Thermodynamic Performance of Pumps and Compressors	5
C Conservation Equations for Steady Flow	16
E Locating the Grid Points	24
J Effects of Rotation, Curvature, and Tip Leakage in Centrifugal Impellers	34
K Case Study: Eckardt's Centrifugal Compressor	43
S Entropy Production Rates from Viscous Flow Calculations Part I - A Turbulent Boundary Layer Flow	69
I Distributions of Turbulent Shear Stress in the Samuel and Joubert Boundary Layer	77
U Entropy Production Rates from Viscous Flow Calculations Part II - Flow in a Rectangular Elbow	81
V Performance Evaluation of Centrifugal Compressor Impellers Using Three-Dimensional Viscous Flow Calculations	88
W Concluding Remarks	97
X References and Further Reading	99
