

PRESSURE LOSS DUE TO THE TIP-CLEARANCE OF
IMPELLER-BLADES IN CENTRIFUGAL AND AXIAL BLOWERS

Y. SENOO

CONTENTS

ABSTRACT

1. Introduction
2. Pressure Loss Due to Leakage Through Clearance
 - 2.1 Drag due to leakage
 - A) Influence of rotation
 - B) Influence of blade curvature
 - C) Influence of number of blades
 - 2.2 Leakage rate and pressure loss
3. Clearance Loss Due to Pressure Gradient
 - 3.1 Annular tip clearance space along the shroud
 - 3.2 Stagnant flow area in the impeller due to clearance
4. Reduction of Input Power Due to Tip Clearance and Working Equations
 - 4.1 Reduction of the input power
 - 4.2 Change of blade loading and leakage velocity due to blockage
 - 4.3 Working equations for pressure losses
5. Change of Pressure Rise and Efficiency Drop Due to Tip Clearance
6. Loading Equations for Centrifugal Impellers
7. Comparison with Experiments
 - 7.1 Experimental performance curves
 - 7.2 Prediction and comparison with experiments
 - 7.3 Influence of impeller geometry on clearance losses
 - 7.4 Distribution of pressure loss along shroud
8. Working Equations for Axial Impellers
9. Comparison with Experimental Data
10. The Optimum Tip Clearance
11. Conclusions
