

# VANELESS DIFFUSERS

Y. SENOO

## CONTENTS

1. Introduction
  2. Circumferential Distortion of Velocity Distribution
    - 2.1 Variation of relative velocity and decay of distortion
    - 2.2 Decay of swirl
    - 2.3 Total pressure loss
  3. Equations for One-Dimensional Analysis
    - 3.1 Decay of swirl velocity
    - 3.2 Radial pressure distribution
    - 3.3 Wall friction coefficient
  4. Axial Distortion of Velocity Distribution
    - 4.1 Equilibrium in radial direction
    - 4.2 Analysis on axially distorted flow
    - 4.3 Pressure recovery of vaneless difussers with various values of specific speed
      - A) Influence of distorted inlet velocity distribution
      - B) Influence of diffuser width
      - C) Influence of flow coefficient
  5. Rotating Stall
  6. Surging
  7. Improvement of Pressure Recovery by Means of Half Vanes
  8. Conclusions
