

LOW-SOLIDITY CASCADE DIFFUSERS FOR  
WIDE-FLOW-RANGE CENTRIFUGAL BLOWERS

Y. SENOO

CONTENTS

1. Introduction
  2. Experimental Apparatus and Procedure
  3. Experimental Results
    - 3.1 Radial distribution of wall static pressure
    - 3.2 Characteristics of blower
    - 3.3 Influence of parameters on pressure recovery
      - A) Number of blades
      - B) Solidity
      - C) Stagger angle
    - 3.4 Oil film trace of flow on the side walls
  4. Pressure Distribution between Blades
    - 4.1 Influence of number of blades
    - 4.2 Influence of solidity
    - 4.3 Effects of stagger angle
    - 4.4 Intuitive parameters to control the secondary flow
  5. Conclusions
