

<u>Contents</u>	Page
Notations	5
1. Introduction	9
2. General Requirements for Measurements in Compressible Turbulent Boundary Layers	10
3. Total Pressure Measurements	14
4. Static Pressure Measurements	16
4.1 Static Pressure Probes	17
4.2 Static Pressure Measurements with Wall Orifices	18
5. Total Temperature Measurements	21
5.1 Bare Wire Probes	22
5.2 Shielded Thermocouple Probes	23
5.3 Combined Temperature-Pressure Probe	24
5.4 Danberg Equilibrium Temperature Probe	24
5.5 Comparative Probe Measurements	25
5.6 Interpolation Between the Wall Temperature and Measured Total Temperature	27
6. Mass Flow Probes	29
7. Some Aspect About the Application of Hot Wire (HW) and Laser Doppler Anemometer (LDA)	31
7.1 Hot Wire Measurements	32
7.2 Laser Doppler Anemometer (LDA)	33
7.3 Experimental Results of Fluctuating Flow Measurements	35
8. Concluding Remarks	37
9. References	38
