

## CONTENTS

	Page
NOTATION . . . . .	iv
INTRODUCTION . . . . .	1
1. SUPERSONIC EJECTOR SYSTEM CHARACTERISTICS . . . . .	1
1.1 Performance Characteristics . . . . .	2
1.2 Flow Regimes . . . . .	3
1.3 Recompression Within Ejector Systems . . . . .	4
1.4 Methodology of Ejector System Performance Analysis . . . . .	5
2. "ZERO" FLOW REGIME . . . . .	5
2.1 Flow Model . . . . .	5
2.2 Primary Flow Field . . . . .	6
2.3 Mixing Component . . . . .	6
2.4 Recompression Criteria . . . . .	7
3. "SMALL" SECONDARY FLOW REGIME . . . . .	9
3.1 Flow Model . . . . .	9
3.2 Primary-Secondary Flow Fields . . . . .	10
3.3 Mixing Component . . . . .	10
3.4 Solution Criterion . . . . .	11
4. "MODERATE TO HIGH" SECONDARY FLOW REGIME . . . . .	11
4.1 Flow Model . . . . .	12
4.2 Inviscid Flow-Fields Analysis . . . . .	12
4.3 Solution Criteria . . . . .	14
4.4 "Downstream" Flow-Field Analysis . . . . .	16
4.5 Two-Stream Mixing Correction . . . . .	18
4.6 Shroud-Wall Boundary Layer . . . . .	19
5. EJECTOR THRUST EVALUATION . . . . .	19
6. EJECTOR FLOW MODEL IMPLEMENTATION . . . . .	20
7. AREAS WARRANTING FURTHER INVESTIGATION . . . . .	20
TABLE I . . . . .	22
