
Table of Contents

1.	Introduction.....	6
1.1	Computer Graphics in a World of Increasing Processing Power	6
1.2	Objectives of this Lecture	7
2.	Possible Applications for Graphics in Fluid Dynamics.....	7
2.1	Graphic Supported Preprocessing.....	7
2.2	Graphic Supported Postprocessing	9
2.3	Animated Postprocessing.....	11
2.4	Process Control by Animation.....	11
3.	Survey on Architectures for Flow Visualization Systems	12
3.1	The Traditional Single Process Architecture	13
3.2	Filters combined in a visualization pipeline	15
3.3	The Modular Approach.....	16
3.4	The Data Flow Paradigm	18
3.5	Object-Oriented Architecture	18
4.	Requirements for a Typical Graphic Postprocessing System.....	20
4.1	Typical operations on flow data.....	21
4.2	Physical meaning of slices of data when using body-fitted coordinates	23
4.3	Quantities of data treated for visualization	24
4.4	Looking for Possible Bottlenecks	25
4.5	Device Dependency of Graphic Software	27
4.6	Software Layers	29
5.	An Implementation of a Graphic System for Fluid Dynamics	32
5.1	Overall Architecture	32
5.2	The Desktop.....	33
5.3	The Database.....	34
5.4	Functionality of the Graphic System	37
5.4.1	The DFVLR-F5 wing as an Example for Data Processing.....	38
5.5	Splitting and Combining Data	38
5.6	Processing of Block Structured Data	41
5.7	Geometry Definition Without Regular Grids	44
5.8	Viewing Mechanisms Useful for Computational Fluid Mechanics.....	45
5.8.1	Vector Graphics for Displaying Grids	45
5.8.2	Wireframe Models	46
5.8.3	Hidden Lines.....	47
5.8.4	Flat Shaded Surface Representation	48
5.8.5	Illumination Model for Use in Combination with Flat Shading.....	49
5.8.6	Gouraud Shades Surfaces	50
5.8.7	Illumination Model Used in Combination With Gouraud Shading.....	51
5.8.8	Depth Cueing	52
5.8.9	Phong Lighting Model	53
5.8.10	Illumination of Polygon Grids	55
5.9	Color Coded Distributions of Physical Quantities.....	55
5.10	Thresholds.....	59
5.11	Calculating Aerodynamic Quantities.....	61

5.12	Equations Used for the Calculation of Aerodynamic Quantities.....	65
5.12.1	Density	65
5.12.2	Pressure	65
5.12.3	Stagnation Pressure.....	66
5.12.4	Temperature	66
5.12.5	StagnationTemperature	66
5.12.6	Enthalpy	66
5.12.7	Internalr Energy	67
5.12.8	Mach Number	67
5.12.9	Entropy.....	67
5.12.10	Velocity Components in x-direction derived from the Momentum	67
5.12.11	Velocity Components in y- and z-direction derived from the Momentum.....	68
5.12.12	Cross Flow Component	68
5.12.13	Momentum in x-direction	68
5.12.14	Momentum in y-Direction	68
5.12.15	Momentum in z-Direction	69
5.13	Combining Pictures.....	69
5.14	Manipulations with the Color Lookup Table.....	71
5.15	Iso Contours.....	72
5.16	Streamlines.....	77
5.17	Operations with MOVIE.BYU-Files	78
5.18	Triangulation.....	78
5.19	Isovalue-Surfaces.....	79
5.20	Plane or arbitrary cuts through fields of data.....	81
5.21	Arbitrary objects and non-regular grids.....	82
6.	Some Advanced Techniques used in Flow Visualization.....	84
6.1	Surface Particles	84
6.2	Texture Mapping on 3d Surfaces.....	85
6.3	Extraction of Topological Details from Flow Fields	86
6.4	Approaches to Increase the Amount of Information Presented by Visualization	87
7.	Animated Flow Visualization	88
7.1	Possible Approaches to Animated Flow Visualization.....	88
7.1.1	The Multi-Million Dollar Animation.....	88
7.2	The Half-a-Million Dollar Approach.....	89
7.3	The Low Cost Approach.....	89
8.	Steps to Create Animated Visualization	90
8.1	Data Analysis.....	92
8.2	Storyboard.....	92
8.3	Visualization of Key Frames	92
8.4	Parameter Interpolation.....	92
8.5	Scene Calculation	92
8.6	Single Frame Storage.....	92
8.7	Scene Manipulations.....	92
8.8	Preview	93
8.9	Scene Redesign	93
8.10	Scene Assembly.....	93

8.11	Bitmap Format Conversion.....	93
8.12	Communication.....	93
8.13	Screenload.....	94
8.14	VCR Control.....	94
8.15	Interface conversion.....	95
8.16	Generation of Composite PAL.....	95
9.	Hardware.....	95
10.	Standards in Software.....	98
10.1	Standard in Computer Graphics.....	98
10.2	GKS.....	98
10.3	GKS-3D.....	98
10.4	CORE.....	98
10.5	PHIGS.....	98
10.6	PHIGS+.....	99
10.7	DORE.....	99
10.8	Graphics in Windowing Environment.....	99
10.9	SUN's Window Server SUNVIEW.....	99
10.10	X-WINDOWS or X11.....	99
10.11	NeWS.....	100
10.12	The Merged X11/NeWS Window Server.....	100
10.13	Window Systems and Toolkits.....	100
10.14	PEX, a Standard for 3d-graphics in Window Systems.....	100
11.	Summary.....	102
12.	References.....	103
13.	List of Figures.....	109
14.	Index of Subjects.....	111
