

FUNDAMENTALS OF COMBUSTION OF PREMIXED GASES

Lectures delivered
at
INSTITUTE von KARMAN
March 1992

Paul CLAVIN

Laboratoire de Recherche en Combustion
CNRS/Université de Provence, S 252
Centre Universitaire de St Jérôme, 13397 Marseille cedex 13, France

C O N T E N T S	pages
I. Introduction	1
II. Formulation of the problem of planar flame propagation	2
III. Asymptotic analysis of a simplified model	3
IV. Laminar flame speed and quenching phenomena	7
V. Dynamics of wrinkled laminar flames	8
1. Local laws	
2. Hydrodynamical effects	
3. Thermal-diffusive instabilities	
VI. Curved fronts	14
VII. The different combustion regimes of turbulent premixed	16
1. The Barrère-Borghi diagram	
2. A simple model	
VIII. Turbulent wrinkled flames	20
IX. The cusped flame regime (weak turbulence and cellular fronts)	22
X. The corrugated flamelet regime (high turbulence intensity)	24
1. Position of the problem	
2. Flame vortex interaction	
3. Propagation mechanisms	
4. Flame propagation in a fully developed turbulence	
XI. Conclusion
