

## Table of contents

<b>Introduction</b>	3
I. Aerothermochemistry equations	3
II. Generalities concerning the pdf formulation	4
III. The pdf transport equation	4
III.1. Convection in probabilistic space	5
III.2. Diffusion in probabilistic space	7
IV. Stochastic representation of the pdf	8
V. Mixing Model	9
V.1. The Dopazo O'Brien mixing model	9
V.2 Curl model	10
VI. Allowed domain for the pdf in composition space	11
VII. Peul method	12
VII.1. Introduction	12
VIII.2. General description of Peul-Diffusion	13
VII.3. The implementation of the Peul model	18
VIII. Monte Carlo method	19
VIII.1. Introduction	19
VIII.2. Description	19
VIII.2.1. Convection and diffusion in physical space	20
VIII.2.2. Convection in composition space and mixing	22
VIII.2.3. Implementation	23
IX. Computation of a diffusion flame experiment using two pdf methods	23
<b>Conclusions</b>	24
<b>References</b>	25
