

TABLE OF CONTENTS

SYMBOLS	1
1.0 INVISCID COMPRESSIBLE FLOW EQUATIONS	5
2.0 HEAT ADDITION TO AN IDEAL GAS	7
3.0 HEAT ADDITION TO A REAL GAS	10
3.1 Isentropic flow in a variable area duct	11
3.2 Constant pressure heat addition	13
3.3 Constant area heat addition	14
4.0 LAMINAR PREMIXED FLAMES	17
4.1 Reaction kinetics	17
4.2 Laminar flame structure	20
4.4 Flame speed and combustion limits	24
4.5 Flashback and blowoff	25
5.0 TURBULENCE	29
5.1 Turbulence generation by bluff bodies	42
6.0 TURBULENT PREMIXED FLAMES	45
6.1 Turbulent flame structure	45
6.2 Flame generated turbulence	51
6.3 Flashback and blowoff	53
7.0 LAMINAR DIFFUSION FLAMES	59
7.1 Combustion of spherical drops and particles	62
8.0 TURBULENT DIFFUSION FLAMES	66
8.1 Turbulent jet mixing	67
8.2 Swirling jets	79
8.3 Ejector mixing systems	81
9.0 STIRRED REACTOR CONCEPTS	85
9.1 Perfectly stirred reactors	89
9.2 Plug flow reactors	94
9.3 P.S.R. combustion limits	95
9.4 Well stirred reactors	97
9.5 Ignition	101
9.6 A relation between turbulence and mixing time	102
10. OPTIMUM BURNER DESIGN	106
11. SUPERSONIC COMBUSTION	112
12. COMBUSTION NOISE	115
