

TURBOMACHINERY FLUTTER

1. Elementary Consideration of Aircraft Wing Flutter	1
1.1 Equations of Motion	1
1.2 Theodorsen Theory	3
1.3 Simplified Approach to Flutter	7
References	11
Figures	12
2. Fundamental Differences Between Turbomachinery Flutter and Wing Flutter	15
2.1 Mass Ratio, Stiffness, and Frequency Changes	15
2.2 Torsional and Bending Stall Flutter Near the Surge Line	17
2.3 Choking Flutter in the Bending Mode	18
2.4 Coupled Blade-Disk-Shroud Flutter	19
References	20
Figures	22
3. Torsional Stall Flutter	25
3.1 Historical Background	25
3.2 Two-Dimensional Work Per Cycle and Aerodynamic Damping	26
3.3 Dynamic Stall and Stall Flutter of a Pitching Isolated Airfoil	30
3.4 Ham's Theory	35
References	37
Figures	39
4. Coupled Blade-Disk-Shroud Flutter	48
Figure	49
